

To the President of the Italian Republic

**YOUR signature to defend the 9th article
of the Italian Constitution**

“The Republic promotes the development of culture and of scientific and technical research. It safeguards natural landscape and the historical and artistic heritage of the Nation”.

The provisions we find in 124/2015 law “mandate for the reform of public administrations” the so-called “Madia Reform” put at risk our heritage. We ask these provisions to not to be applied to the Cultural Assets sector.

We ask that the 'silent consent' is not applied to the proceedings relating the cultural heritage and the landscape, since the time periods provided, even if extended, would not guarantee the protection of our cultural heritage.

- We ask for the recognition of the specificity and complexity of the cultural heritage sector, for which it is required scientific and technical expertise to ensure the protection, use and enhancement of our cultural heritage and landscape. The confluence of the Institutes of the territorial MIBACT in the territorial Ufficio dello Stato could jeopardize the acquired technical and scientific skills, which are essential for the survival of the cultural heritage of our nation

Cultural assets constitute people identity and we must defend and preserve them, like our Constitution states.
